Abdominal aortic diameter ≥ 3 cm typically constitutes an abdominal aortic aneurysm. The cause is multifactorial, but atherosclerosis is often involved. Most aneurysms grow slowly (~10%/year) without causing symptoms, and most are found incidentally. Risk of rupture is proportional to the size of ...

What: Horizontal mattress suturing is a fairly useful back-pocket trick to have in your repair arsenal. It's most useful for high tension wounds especially when the edges are fragile or frayed. When: Truth told, I don't personally use these sutures often for primary repair, as they don't create as meticulous of wound edge apposition as...
